# SHELL ALKALINE BATTERIES

The Shell Alkaline Batteries have high energy density and long shelf life, holding the power for up to 10 years while in storage. With better power performance, these batteries feature no-leakage protection when serving high drain devices. Multiple grades of batteries are available in a variety of sizes to fit most applications.

## FEATURES

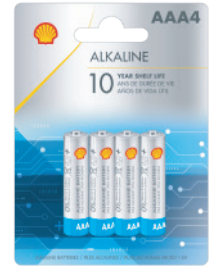

- Efficient discharge and long-lasting power performance
- Sustain high-drain devices with powerful energy
- Unique anti-leakage seal technology
- Extended storage life of up to 10 years\*
- Mercury and cadmium free

\* Based on lab tests.

## MODEL CR2032-BP1 & CR2025-BP1

# 3.0V LITHIUM BUTTON CELLS

The Shell Lithium Button Cells are reliable and safe. Despite their compact size, these button cells are designed with long shelf life and strong power output. They are the ideal choice for small energy-hungry devices such as car keys, calculators, watches, laser pointers and other similar items.

CR2032-BP1

CR2025-BP1

## FEATURES

- Powerful and stable performance
- Low self-discharge, long storage life
- Outstanding anti-leakage protection
- High energy density
- Mercury and cadmium free
